

## Dropping Linked Courses

There is a fundamental difference between linked components that have only one section, and those with multiple sections:

1. If the course has only one Snn (ANTH 0300 for example) then you can drop all components by dropping the section. **\*NOTE: This does not apply to a course that has more than one component required (MCM 0240 has a section, a conference and filming) for such courses please refer to #2)**

The screenshot shows the course page for ANTH 0300, Culture and Health, and the Cart Contents. The course page includes details like Section S01, CRN 25749, Spring 2026, Maximum Enrollment: 200, Seats Avail: 82, and a 'DROP' button circled in yellow. The Cart Contents shows a list of courses: ECON 1629, MCM 0903M, SOC 1100, and ANTH 0300. The ANTH 0300 section is highlighted in yellow.

**Course Description**  
An introduction to the field of Medical Anthropology. Lecture reading and discussion will examine the social context of health and illness, looking at the diverse ways in which humans use cultural resources to cope with disease and develop medical systems. The course will provide an introduction to the overall theoretical frameworks that guide anthropological approaches to studying human health related behavior. Medical anthropology offers a unique and revealing perspective on the cultural diversity that characterizes human experiences of sexuality, disease, aging, mental illness, disability, inequality and death.

Course Description

Literary historians generally agree that in the 1970s, in the U.S., there was a significant increase in the publication of diverse forms of African American literature. The 1970s is also often described by scholars as a decade in which there was a renaissance of African American women's writing as well as the publication of several experimental African American literary works. In this seminar, we will study this lively period in African American literary history primarily through novels, some of them recently republished or adapted into other forms. What idea of African American literature do we get when we read novels from this era? What questions were asked in 1970s African American novels that we continue to ask now? Novels we will likely read include detective fiction, diaristic fiction, satirical fiction, a love story, and historical fiction.
